

GMCraft 60

Weather-Resistive Barriers

Product Data Sheet

Product Description

GMCraft is asphalt saturated building paper, and is also described as a weather-resistive barrier, or moisture barrier in building codes. It is designed for installation behind stucco and other exterior wall claddings as a “secondary weather barrier”. **GMCraft** contributes to the prevention of internal wall damage due to exterior moisture penetration or interior condensation.

Products Standards

GMCraft 60 is a “weather-restrictive barrier” as described in Section 1404.2 of the 2000 International Building Code® (IBC) and also qualifies as a “weather-resistive sheathing paper” as described in Section R703 of the 2000 International Residential Code™ (IRC).

GMCraft 60 exceeds the standards set in Federal Specification UU-B-790a, Type 1, Grade “D”, Style 2, and complies with Section 1402.1 of the 1997 Uniform Building (and subsequent UBC and CBC editions).

GMCraft 60 has maintained ICC (formerly IBCO) Evaluation Reports, since October of 2000 and satisfies the test criteria for weather-resistive barriers (AC 38) dated July 2000. The outer surface is boldly printed with appropriate ICC ESR identification information. The current ESR 2376 is dated May 1, 2010.

GMCraft 60 is evaluated by ongoing testing to insure that it meets or exceeds industry standards (including ASTM D-779-03, ASTM D-828). March 29, 2010 test results from an ICC Certified Testing Laboratory are listed below:

GMCraft 60	Test Method	Test Results
Water Vapor Transmission	ASTM E-96-00	<u>90 grams Pass</u>
Water Resistance	ASTM D-779	<u>Exceeds 60 minutes</u>
Tensile Strength	ASTM D-828	<u>MD 60 lb-f/in</u> <u>CD 44 lb-f/in</u>

Physical Description

GMCraft 60 *Single* cover 240 SF (Roll Size: 40” x 72 lineal feet)
 GMCraft 60 *Double* covers 162 SF (Roll Size: 40” x 49 lineal feet – 2 layers)

Manufactured by
GMC Roofing & Building Paper Products, INC.
 6400 Zerker Road, Shafter, CA. 93263
