FIBERGLASS SLATE SELVAGE EDGE

PRODUCT DESCRIPTION

GAP Fiberglass Slate Selvage edge rolls are manufactured from fiberglass mat and is coated on both sides of the fiberglass mat with weathering grade asphalt coating and one half of the sheet is covered on the top with ceramic mineral slate surface granules and the other half with fine sand. This produces a 19" selvedge surface for overlapping.

Available in two popular colors: White and Black

The following colors are also available with a minimum truck order.

Colors: Brown, Green, Red, Cedar and Weathered Wood

PRODUCT USE

GAP Fiberglass Slate Selvage edge roll is used with cold adhesives for very low slope roofs and flat roofs It is also used as cap sheet in the construction of build-up-roofs. This product is available in seven colors to match the existing roof colors.
