VALLEY SEAL

PRODUCT DESCRIPTION

Valley Seal is a unique and highly versatile glass fiber reinforced sheet sandwiched between two layers of superior quality polymer modified bitumen. Due to its remarkable characteristics, Valley Seal meets the requirements of ASTM D1970 Moisture Vapor Permeability and ASTM D4869 Liquid Water Transmission tests.

PRODUCT USE

Specially formulated SBS gives lasting performance. Polymer modified asphalt gives excellent pliability. Excellent durability. Lays flat and resists wrinkling for ease of application. Easier to work than metal. Meets ASTM D226 Type I and II; ASTM D4601. Passes ASTM D4869 Liquid Water Transmission test. Passes ASTM D1970 Moisture Vapor Permeability test.

TECHNICAL DATA

Width of Roll 36"

Roof coverage per Roll 1 Square

Pallet Size: Number of Rolls per Pallet: 35

MANUFACTURING LOCATIONS: Pryor, OK
